SUMMARY

Aspiring Software Developer with expertise in Java, web development, and database management. Seeking to apply my problem-solving skills and technical proficiency in a challenging role to develop innovative software solutions, enhance system functionality, and contribute to a dynamic, technology-driven environment.

SKILLS

- Java Programming
- SQL
- HTML
- CSS
- C Program
- Git Version Control
- Python Basic
- Basics Of Spring Boot
- Team Work

PROJECTS

Portfolio Website

June - 2024

- I built a portfolio website using HTML and CSS where I showcased my background, skills, and contact details. It was my first step into frontend development and helped me understand how websites are structured.

Console-Based Instagram Clone (Java, OOP, Collections)

Jan- 2025

- Developed a console-based social media app allowing user sign-up/login, post creation, commenting (with limits), and post editing.
- Applied object-oriented design using classes like User, Post, Likes, and Process to ensure modular structure and reusability.

TEG-Based Power Generation from Exhaust Gas and Boiler Heat Monitoring

Feb - June, 2025

- Conducted detailed performance analysis of thermoelectric generator (TEG) systems to extract electrical energy from industrial exhaust heat.
- Collected and interpreted heat data from boiler systems to assess energy recovery potential and optimize thermal efficiency.

INTERNSHIP

Java Programming Intern | Code Alpha

sept - 2024

- Completed a one-month online Java development internship at CodeAlpha, focusing on building console-based applications like a student grade tracker, bank system, and hotel reservation tool. Improved skills in Java OOP, collections, and input validation.
